

November 1, 2017

Dear parents, teachers, and employees:

In 1986, Congress passed the Asbestos Hazard Emergency Response Act (AHERA). AHERA is a provision of the Toxic Substances Control Act. It requires that local education agencies (LEA) such as Advantage Arts Academy inspect for asbestos containing building materials, prepare and maintain up-to-date AHERA Management Plans, and notify occupants of the plan on a yearly basis. This is an effort to prevent the exposure of asbestos to the occupants of our school building.

Our architects and builders have certified that no asbestos containing materials will be used in the construction of the Advantage Arts Academy building; therefore, no asbestos containing materials should be identified. We continue to be alert to ensure that suspected asbestos-containing materials do not pose a hazard to our students and staff.

Advantage Arts Academy's AHERA Management plan will be available for review in the main office after the school has been constructed and has been submitted to the Utah Department of Environmental Quality/Division of Air Quality.
